Tsun-Tse (Robin) Cheng

Legal AI Evaluation & Product Builder

Taipei, Taiwan · robin604164@gmail.com · lawgodai.com

SUMMARY

Taiwanese-law researcher and software developer. Founder of Law God, an AI study platform for Taiwan's bar and judicial exams, where I audit AI-facing legal content for correctness: answer keys, explanations and citations. Passed the First Stage of Taiwan's Bar and Judicial Officer Examinations. Native Traditional Chinese; TOEFL iBT 100.

EXPERIENCE

Law God (法老科技有限公司) — Founder, Legal Content Designer & Lead Developer 2025 – Present

- Audited a 1,500-question Taiwanese bar-exam MCQ bank end to end, covering every answer key and option-by-option explanation. Revised 385 explanations; 0 critical defects remain.
- Built an automated citation audit: 7,595 statute citations checked by script and 290 court-decision citations confirmed against official sources. This found and fixed 2 real case-number errors.
- Set the question drafting and review process: items are returned when facts are incomplete, choices overlap, wording is unclear, or the answer is not fully supported.
- Added product checks that flag unsupported citations instead of presenting them as settled law.
- Built and deployed the platform: Python, FastAPI, PostgreSQL/SQLite, FAISS retrieval over a 21-subject knowledge base (804 chapters, ~86K passages), streaming APIs, monitoring, quota controls and security safeguards.

EDUCATION

National Chengchi University — M.A. Candidate, Law & Interdisciplinary Studies Expected 2027

Thesis (proposal stage): *Reconstructing the Board of Directors' Duty of Oversight under Algorithmic Mediation: From Internal Control to Technology Governance* (《演算法中介下之董事監督義務再建構：從內部控制到技術治理》).
