Tsun-Tse (Robin) Cheng

Legal AI Evaluation & Product Builder — Curriculum Vitae

Taipei, Taiwan · robin604164@gmail.com · lawgodai.com

PROFILE

Taiwanese-law researcher and software developer working on AI and law. Founder of Law God, an AI study platform for Taiwan's bar and judicial exams, where I review legal multiple-choice questions, write and check answer explanations, verify citations and build the software behind those tasks.

EDUCATION

National Chengchi University, Taipei — Expected 2027

M.A. Candidate, Graduate Institute of Law and Interdisciplinary Studies · Advisor: Prof. Ying-Ju Chen (陳盈如)

- **Thesis (proposal stage):** *Reconstructing the Board of Directors' Duty of Oversight under Algorithmic Mediation: From Internal Control to Technology Governance* (《演算法中介下之董事監督義務再建構：從內部控制到技術治理》).
- Question: when machine-learning systems decide which warning signs reach the board, what must directors oversee? The thesis proposes extending oversight from the red-flag response to the mechanism that generates red flags, and extending Taiwan's internal-control framework from transaction cycles to the model lifecycle.
- Materials: Delaware oversight case law (*Caremark* line, *Marchand*, *Boeing*), Japanese internal-control law, and Taiwan's securities and internal-control regulations.
- Coursework: Civil Procedure, Criminal Law, Corporate Finance, Securities Trading Law.

University of Maryland Carey School of Law, Baltimore — Spring 2026

Exchange Student, J.D.-level courses · GPA 3.50

- Trade Secrets (A-) · Introduction to Legal Research (A-) · Foundations in Business Law (B+)
- Coursework in U.S. legal research and comparative analysis, conducted in English.

National Taiwan University, Taipei — June 2023

B.B.A., Minor in Law

CREDENTIALS

- **TOEFL iBT:** 100/120 (Reading 30/30, Listening 28/30), test date Nov 18, 2024. Full score report on request.

EXPERIENCE

Law God (法老科技有限公司) — Founder, Legal Content Designer & Lead Developer — 2025 – Present

Taipei · lawgodai.com

- **Question-bank QA.** Audited a 1,500-question Taiwanese bar-exam MCQ bank end to end, reviewing every answer key and option-by-option explanation for legal support, current law and internal consistency. Revised 385 explanations; 0 critical defects remain.
- **Citation verification.** Built an automated audit that checked 7,595 statute citations by script and confirmed 290 court-decision citations against official sources. It found and fixed 2 real case-number errors.

- **Drafting and review process.** Defined how new questions and distractors are written and reviewed. Items are returned when facts are incomplete, choices overlap, wording is unclear, or the proposed answer is not fully supported.
- **Hallucination controls.** Connected legal answers to statutes, court decisions and study materials, and added checks that flag unsupported citations instead of presenting them as settled law.
- **Engineering.** Built and deployed the platform with Python, FastAPI, PostgreSQL and SQLite, FAISS vector retrieval over a 21-subject knowledge base (804 chapters, ~86K passages), streaming APIs, monitoring, quota controls and security safeguards.

SKILLS

- **AI & evaluation:** LLM evaluation workflows, prompt and rubric design, RAG, human-in-the-loop QA, citation and hallucination controls.
- **Technical:** Python, FastAPI, PostgreSQL, SQLite, FAISS/vector search, REST and streaming APIs, Git, macOS.
- **Legal:** Taiwanese law, Traditional Chinese legal writing and editing, legal research and source verification, U.S. legal research.
- **Languages:** Traditional Chinese (native), English (TOEFL iBT 100; U.S. law school coursework).
